Institut Pasteur

28, RUE DU DR ROUX - PARIS XV^e

TEL. : SÉGUR 01-10

Dear Tosh:

Amid the local, fanatic "Y" systems - I am trying to reverse a few reactions, e.g. the move out of Michigan.

As you mentioned last summer - that you would give us a hand in getting into the Univ Apts. that you showed us.

(If possible we would like to make the necessary applications.
(2 bedrooms - unfurnished - we have our own except refrigerator & stove)
This will give us a chance to look around before making other more permanent plans.

I am looking forward to being in closer association with you and Ester - as well as the other groups on campus. The new quarters must be very pleasant.

Jean and I are following the usual course of events - part science and part pleasure. Contrary to some of our advice before coming, we found that everyone at the Institut has been very pleasant and have showered a good deal of pleasure in Paris. Have had a good chance to visit and experiment with Stromness, listen to Vollman & Jacob and try a missionary job with Jacque.

I would like to arrange to have George Cohen come over in a year and a half from now. Are there any provisions in the University funds at this time to enable his support for a year?

Best regards from both of us -

Frank
